

Prunus shimidsu Sakura

Japanese Cherry — Blushing Bride

Prunus shimidsu Sakura 2.0-2.5m Multi Stem CG

Prunus shimidsu Sakura is a small, slow growing deciduous flowering ornamental cherry, with an elegant vase shape, wide spreading habit.

The *Prunus shimidsu Sakura* has beautiful delicate blossom that hang down in clusters of large double flowers 5cm in width, opening pink and fading to bright white as the season progresses.

The tree also offers interest during the autumnal months. The young leaves starting as pale bronze green, maturing to darker green leading to orange / red in the autumn.
